About Us

We strive to attain long term Commercial Excellence

Symbio Generics India Private Limited is a specialized Pharmaceutical Active Pharmaceutical Ingredients (APIs) manufacturing, marketing, and service organization. Symbio strives to attain long term commercial excellence to our formulation partners by aligning to their regional and global strategies. We partner with pharmaceuticals, life sciences, biotechnology, agrochemicals, and specialty chemicals companies to deliver active ingredients, intermediates and R&D services.

Symbio's manufacturing facilities are situated near Bengaluru and Vishakhapatnam. Our core competency lies in the supply of APIs globally. We have a well-established sales and distribution network catering to the leading generic companies in emerging and regulated markets. We believe in supplying best quality APIs that are adherent to international regulatory, production, and quality control standards. It has been our constant endeavour to work with Global pharma Companies & Emerging pharma Companies in India and International markets to meet their expectations on products and services.

About Us

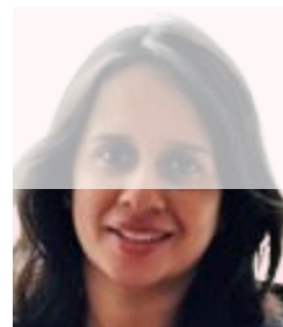

OUR IDENTITY

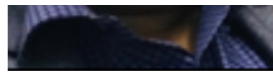

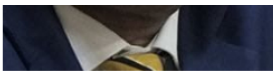

Our choice of RED for our logo has been a well deliberated one. While RED is the chosen colour for a lot of iconic brands in the world and we aspire to be in the big league sooner than later, the values and expression that this primary colour exudes defines the direction we are headed in.

Red connotes passion in any form it takes and also strongly signals positivity and optimism. The team's passion and collective energy has brought the company to where we are today and the same energy albeit magnified is going to get us to next level. Core to our ethos is the power of symbiotic relationships and the ability to energize each other as individuals and businesses alike, and an apt representation of the same is the energy of the exuberant RED. The symmetry in logo design reflect the same ideology. We will continue to hold this value close to our hearts, for external clients and customers as well as internally with our employees and team members.
